---

Diverse technologies underpin the operation of 100M-class energy storage power stations, catering to different energy storage requirements and applications. Each technology ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

Lightshift's battery storage projects are designed to provide energy reliability and cost stability, addressing the challenges of increased electricity demand and renewable energy ...

The project will help displace fossil fuel-fired generation when the demand for power is highest. The 100 MW East River Energy Storage System will hold enough electricity to power more ...

Today, the U.S. Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) issued a Notice of Intent (NOI) for up to ...

Today, the U.S. Department of Energy's (DOE) Office of Clean Energy Demonstrations (OCED) issued a Notice of Intent (NOI) for up to \$100 million to fund pilot ...

Founded in 2019, Hithium specializes in battery energy storage systems (BESS). Its stationary energy storage products are designed for utility-scale as well as commercial and ...

The US government's Department of Energy (DOE) is set to pump \$100 million into projects looking at non-lithium batteries for long-term energy storage.

The US Department of Energy (DOE) has announced a \$100 million investment in advanced battery research, aiming to enhance energy storage capabilities for electric vehicles ...
