Hexclad are worthless. They don't do anything more than what a normal non-stick pan would do, and they do that a non-stick is supposed to do worse. If you want non-stick, get ...

0 I'm building an object detection model with convolutional neural networks (CNN) and I started to wonder when should one use either multi-class CNN or a single-class CNN.

The concept of CNN itself is that you want to learn features from the spatial domain of the image which is XY dimension. So, you cannot change dimensions like you ...

A convolutional neural network (CNN) is a neural network where one or more of the layers employs a convolution as the function applied to the output of the previous layer.
