Who are Sungrow solar inverters?

A global inverter and storage manufacturer with a complete range of products for solar and storage projects in Australia and New Zealand. Sungrow make a complete range of solar inverters and energy storage products for residential, commercial, industrial and utility grade solar projects.

What types of inverters are available?

These are available as: Single-phase: designed for home and small business applications. Three-phase: developed for higher yield and more suitable for commercial environments. Hybrid inverters: have the option to draw power from the grid or your energy storage system. Hybrid inverters are great during power blackouts.

What is an inverter & energy storage solution?

There is an inverter and energy storage solution for every application including grid connected, backup power and off grid. Designed specifically to suit Australian and New Zealand conditions and safety design standards.
