---

Fifth generation (5G) wireless communication is being rolled out around the world. In this work, the latest radio frequency electromagnetic field (EMF) exposure measurement ...

As the roll-out of the fifth generation (5G) of mobile telecommunications is well underway, standardized methods to assess the human exposure to radiofrequency ...

This booklet provides an introduction to 5G technology, an explanation as to how 5G networks operate, and provides an overview of the international safety guidelines for the levels of EMF ...

In this paper, we investigate the main categories of misinformation regarding 5G, i.e., fake theories, the misconception of 5G ...

For the fifth generation (5G) networks, a standardized approach for extrapolating EMF values is yet to be defined. This work provides an overview of the state-of-the-art research that focuses ...

Despite extensive studies into the health effects of mobile phones and base stations over the last two or three decades, there is no indication of an ...

This article dives into protecting tower-mounted amplifiers and advanced antenna systems of 5G macro base stations from electrical ...

In this case report we present a woman aged 52 years who developed health problems consistent with the microwave syndrome after ...

This white paper provides information related to human exposure to radio frequency electromagnetic fields (RF EMF) from the base stations in the new 5G networks and describes ...

In this paper, we investigate the main categories of misinformation regarding 5G, i.e., fake theories, the misconception of 5G features, and open questions that require further ...

This article dives into protecting tower-mounted amplifiers and advanced antenna systems of 5G macro base stations from electrical hazards.

Performance of three different methodologies and equipment (broadband probes, spectrum analyzers, and drive test scanners), in the context of human exposure to ...
