This project is the first utility-scale renewable project in Togo. With additional phases, 70MW Solar PV+ 4MWh BESS has been operational since June 2023.

This plant, the largest in West Africa, uses solar tracking technology that maximizes panel efficiency. It significantly contributes to ...

S'étendant sur 52 hectares, cette centrale aura une capacité de 25 MWc, avec un système de stockage par batteries (BESS) de 36 MWh et un raccordement en 20 kV. Elle ...

Planning, careful data gathering, and analysis are essential. This paper addresses such an activity, the development of a Solar Roadmap for the West African Republic of Togo.

RELP et le gouvernement du Togo ont signé un accord de coopération pour promouvoir et déployer des systèmes de stockage d'énergie par batterie (BESS) afin ...

Located in the village of Blitta, the solar plant will be extended from 50MW to 70MW and will include a Battery Energy Storage System to prolong the availability of clean ...

Togo has launched an ambitious 400 MW solar project in Kpalassi, a pivotal step in its strategy to accelerate the national energy ...

Rooftop solar installations and standalone solar systems are becoming increasingly prevalent, particularly in urban areas. Government incentives, such as tax breaks and ...

This plant, the largest in West Africa, uses solar tracking technology that maximizes panel efficiency. It significantly contributes to reducing CO2 emissions, with more than one ...

A BESS panel on a solar roof in Togo

Atelier consacre a la formation axe sur l'integration des systemes de stockage d'energie par batterie (BESS) dans l'infrastructure energetique du pays.

Togo has launched an ambitious 400 MW solar project in Kpalassi, a pivotal step in its strategy to accelerate the national energy transition and meet renewable energy targets.

Villagers, traders, and visionaries--Togo's solar surge is your chance to plug in. Solarvance crafts the gear to power your Togolese tomorrow. Reach out today to join Togo's bright ascent.
