---

As a country situated in a region with abundant solar resources, Albania has enormous potential for using solar energy through photovoltaic (PV) systems. With the energy ...

Albania is witnessing an energy revolution with the Karavasta solar power plant. This ensures a stable electricity supply, reduces dependence on oil, and protects local biodiversity.

Developed by Voltalia, the 140 MW solar park was commissioned at the end of 2023 and is expected to generate 265 GWh ...

Developed by Voltalia, the 140 MW solar park was commissioned at the end of 2023 and is expected to generate 265 GWh of electricity annually -- enough to power ...

Albania is advancing its renewable energy ambitions with a planned 50 MWp ground-mounted solar power plant in Belshi, central Albania. While initially slated for 2025, ...

Albania's Ministry of Infrastructure and Energy has received four applications for solar projects with a total installed capacity of 235 MW. The projects are planned to be built in ...

Albania is witnessing an energy revolution with the Karavasta solar power plant. This ensures a stable electricity supply, reduces dependence on oil, ...

Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar ...

Albania is taking a significant step forward in its renewable energy journey with the development of a new 50-megawatt solar park in the town of Belsh. This ambitious project, ...

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the ...

Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar projects with a cumulative capacity totaling ...

Albania marked a significant milestone in its energy sector with the inauguration of the Karavasta Photovoltaic Park, the largest solar energy facility in the Western Balkans.
