An investigation into aqueous titanium speciation utilising electrochemical methods for the purpose of implementation into the ...

This paper describes the trend of electrolyte research for redox flow batteries and the characteristics of the titanium-manganese electrolyte.

Combined with its excellent stability and low cost, the new-generation iron-titanium flow battery exhibits bright prospects to scale up and industrialize for large-scale energy storage.

Titanium anodes are used as oxygen precipitation electrodes in this type of battery, which need to work stably for a long period of time in a strong acidic electrolyte.

Herein, a titanium-bromine flow battery (TBFB) featuring very low operation cost and outstanding stability is reported. In this battery, a novel complexing agent, 3-chloro-2 ...

Further, the very high (approaching 10 M) solubility of Ti in low pH solutions suggests the possibility of developing exceptionally high energy density aqueous Redox Flow Batteries ...

Redox flow batteries (RFBs) or flow batteries (FBs)--the two names are interchangeable in most cases--are an innovative technology that offers a bidirectional energy ...

An investigation into aqueous titanium speciation utilising electrochemical methods for the purpose of implementation into the sulfate process for titanium dioxide manufacture.

The selection of articles represents the emerging chemistries and methods that can be adopted to explore next-generation flow battery technologies, optimize the performance of ...

On October 15, the Xinxin Vanadium Titanium Xingtai GW-class all-vanadium liquid flow energy storage battery research and production base project started construction in Xingtai Economic ...

To improve the cycle life, we propose a charge-induced MnO<sub>2</sub>-based slurry flow battery (CMSFB) for the first time, where nano-sized MnO<sub>2</sub> is used as redox-active material. ...

Herein, a titanium-bromine flow battery (TBFB) featuring very low operation cost and outstanding stability is reported. In this battery, a ...
