Will battery storage improve air quality in New York?

New York has among the most stringent fire safety codes in relation to battery storage in the nation with updated codes adopted in 2025. After the codes were adopted, a group of former FDNY leadership released the following statement. Battery energy storage systems will improve air quality and help support the state's clean energy transition.

Are battery energy storage facilities safe in New York?

Yes. New York is home to 6,000+ battery energy storage facilities. Fires at these facilities are rare, and developers and regulators in New York have already begun taking steps to mitigate risks by implementing enhanced safety protocols and emergency response plans - and reviewing and updating existing fire codes.

How many battery energy storage projects are there in New York?

There are 5,000+ existing battery energy storage projects in New York, storing 340.70 MW of clean energy that has bolstered grid resiliency for local communities. (Source: NYSERDA) Read on about the great improvements battery energy storage facilities are making to our electricity grids.

How can battery energy storage improve air quality?

Battery energy storage systems will improve air quality and help support the state's clean energy transition. Battery energy storage offers a clean, reliable solution to meeting peak demand by replacing fossil fuel-emitting peaker plants. Renewable energy also benefits our water resources.

Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North America leads with 42% market share, ...

This diverse resource includes energy storage that can provide dispatchable power on intra-day and/or multi-day time-scales, and includes various types of mechanical energy storage, ...

The company partners with organizations such as Binghamton University, Rochester Institute of Technology (RIT), New York Battery and Energy Storage Technology ...

Efforts towards a finalized implementation plan have been ongoing since June 2024, when Governor Hochul first announced that the PSC had approved an Energy Storage ...

The geniuses who are planning New York's energy future think that they can make intermittent wind and solar generators work to power the electrical grid by the simple device of ...

In June 2024, Governor Hochul announced that the Commission had approved a new Energy Storage Roadmap for the state to achieve a nation-leading six gigawatts of ...

Battery energy storage will be increasingly necessary to store power from renewable energy, like wind and solar, over the coming years to create a more reliable electric grid that delivers clean ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

As the photovoltaic (PV) industry continues to evolve, advancements in Energy storage for electric vehicles alofi have become critical to optimizing the utilization of renewable energy sources. ...

The company partners with organizations such as Binghamton University, Rochester Institute of Technology (RIT), New ...

The PSC approved NYSERDA's proposal and further required that NYSERDA update these requirements "if and when" the New York ...

The PSC approved NYSERDA's proposal and further required that NYSERDA update these requirements "if and when" the New York State Fire Prevention and Building ...
