Asuncion faces unique energy challenges with its tropical climate and growing industrial sector. The city's peak electricity demand reached 1,850 MW in 2023, yet renewable integration ...

Gravity-based energy storage developer Energy Vault has started construction on its first commercial-scale project. The 100 MWh energy storage system is being built near a wind farm ...

The objective of the project HA-G1048 is to maximize the use of the energy produced by the 8-MWp solar photovoltaic plant (SPP) to further reduce the use of thermal power, by ...

Energy Vault, a grid-scale energy storage solutions developer known for its gravity storage technology, has commissioned what they claim will be the world's first grid-scale gravity ...

In this study, a new emerging energy storage system named gravity energy storage (GES) is integrated into large-scale renewable energy plant with an aim to investigate its optimal design ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

The Asuncion Energy Storage Project bidding process aims to fix this glaring inefficiency through a 150MW/600MWh battery storage system, potentially becoming South America's largest ...

When Paraguay's National Power Company announced the winning bidder for its landmark Asuncion Energy Storage Project last week, industry analysts weren't just watching ...

The project is designed to have an energy storage capacity of 100 megawatt-hours, which can power 3,400 homes for a day, and the system is expected to be completed in June.
