In 2022, Austria generated approximately 60 billion kWh of electricity, with renewables accounting for 47 billion kWh, including hydroelectric, wind, and solar energy.

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above ...

In a Europe-wide comparison, Austria ranked as the country with the second highest share of renewable electricity generation in 2023, after Luxembourg (89.6%) and ahead of Lithuania ...

Austria has a mature onshore renewable energy market, especially in hydropower, wind and solar. Projects vary from small rooftop photovoltaic systems to utility-scale wind farms.

Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

Austria's power generation mix is already very green, with 77% currently coming from renewable sources, mostly hydro and wind. The new legislation aims to reach 100% ...

Hydropower plants account for more than 60% of the electricity produced in Austria. Taking wind, biomass and solar into account, renewable power generation rises to more than three-quarters ...

Renewable energies are the economic engine of the future worldwide. Here you can find selected data on Austria's renewable energy sector.

Austria has set ambitious renewable energy and climate protection targets, reaching 100% electricity
