Why are batteries important in a substation?

Batteries are among the least expensive pieces of equipment in a substation, and they are the heart that keeps the protection and control system running. Despite this, they are often not maintained properly. NERC standards make battery maintenance mandatory and its requirements are more stringent than those for other equipment.

What is a battery discharge test?

A discharge test is that in which the battery delivers a current to a load to determine its ability to meet specific criteria such as duty cycle, service or a determined capacity before or at reaching its end of discharge voltage. The voltage of each cell should be monitored throughout the discharge to identify weak cells.

How do I reposition the battery access panel?

Do not force the battery plug into the connector incorrectly. Replace the battery access panel by securing it in place and reposition the bottom cover by aligning the white bar on the cover with the same type of vertical mark on the side of the ADT Base.

Can a basebatt SR rechargeable lithium-ion battery be used with ADT Security Systems?

The BASEBATT-SR rechargeable lithium-ion battery pack is compatible with both ADT Security Systems. **BATTERY CAUTION:** Risk of fire, explosion, and burns. Do not recharge, disassemble, heat above 212°F (100°C) or incinerate. Dispose of used batteries properly. Keep away from children. If batteries are swallowed, immediately see a doctor.
