What is a battery line Safety Cabinet?

The BATTERY line safety cabinets are specially constructed to meet the high requirements for the safe storage and charging of lithium-ion batteries, which can self-ignite in the event of malfunction.

What are the safety storage cabinets for lithium-ion batteries?

Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) -- fire protection from the outside-in and from the inside-out.

Why should you choose Ion-line battery storage cabinets?

Dangerous: Unattended storing and charging of batteries. All-round protection: ION-LINE safety storage cabinets for your safety. Frequent, sometimes weekly accidents and countless damages prove that the unattended charging and storing of batteries, for example, overnight, poses significant risks and dangers.

How do I choose a battery storage cabinet?

No matter what safety level you choose, all cabinets offer these key safety features: If you only wish to store batteries in the cabinet, choose the STORE version. If you intend to charge (active storage) batteries directly in the cabinet, then choose the CHARGE version.

In contrast to other safety storage cabinets, the BATTERY line has a novel feature: a mechanism which automatically closes and locks the cabinet doors in the event of a fire inside the cabinet. ...
