---

Molex supplies a wide range of battery connectors, all designed to provide a robust and reliable contact interface and a high number of mating cycles.

Designed specifically for battery packs, the ARaymond high-power module-to-module clipped connector ensures quick, easy, touch-safe assembly and disassembly.

Hybrid and electric vehicles have a high voltage battery pack that contains different modules and cells reunited to series and parallel. Explore durable connectors for battery modules by ...

Our extensive range of battery connectors includes solutions for both charging and discharging, providing robust connections to meet your specific requirements. Whether you ...

Facilitating more efficient integration of cells and modules within the battery pack, miniaturized connectors from Molex offer reduced weight, compact form factors and rugged features ...

Our portfolio of products supports the various requirements for design engineers and provides what is necessary for reliable connections between a main PCB and a battery pack.

The functionality of these systems relies upon the critical connection to the battery modules. The Industrial Battery Connector (IBC) from Anderson Power features a patent ...

Our extensive range of battery connectors includes solutions for both charging and discharging, providing robust connections to meet ...

Miniaturized, vibration-tolerant connectors from Molex offer secure locking mechanisms and flexible configurations, helping create safe, efficient and high-performance battery modules.

The functionality of these systems relies upon the critical connection to the battery modules. The Industrial Battery Connector (IBC) ...

Connecting and protecting the battery from the inside out. We provide safe, reliable solutions to manage the flow of power in, out and around the pack. You can count on our expertise in ...

Amphenol HC Signal Series connectors are designed as a high-performance, cost-effective solution for the signal and power transmission for PDU in a battery pack.
