Does Berlin Packaging offer un-certified packaging solutions for lithium batteries?

At Berlin Packaging we offer UN-Certified packaging solutions for lithium batteries, ensuring compliance with IATA, ADR, and IMDG regulations.

Are lithium batteries safe?

However, it's important to note that lithium batteries are generally safe when used properly, but they carry some risks, including the potential for thermal runaway. Thermal runaway is a phenomenon that can occur when a lithium battery experiences an uncontrolled increase in temperature, leading to a self-sustaining and uncontrollable reaction.

Why do you need a certification for lithium batteries?

All our packaging for lithium batteries has been tested and provided with UN-Certification. This certification ensures that the product has passed a worst-case scenario fire testing, leak testing and drop testing and evaluation to ensure its effectiveness in containing and preventing hazards associated with lithium batteries.

Choosing the right lithium battery pack in Berlin's competitive market can feel like navigating a maze. Whether you're powering solar farms, industrial equipment, or commercial buildings, ...

A new service from Photovoltaik Institut Berlin (PI Berlin) looks to solve a pitfall that often awaits solar industry stakeholders when adding energy storage to their projects: making ...

Berlin Packaging Dangerous Goods can supply you with all kinds of packaging solutions for "metal" and "ion" lithium batteries. We have four standard sizes of UN-Certified boxes for lithium ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

DOT-SP 21690 allows for the shipment of multiple batteries per BUNCKER(R) by freight or rail, with no inner packaging required.

In this blog, we will explore the key technologies behind battery energy storage containers and analyze the leading advantages of ...

New Yorkers fighting the opening of massive battery energy plants in their neighborhoods have a powerful new ally: US Environmental ...

New Yorkers fighting the opening of massive battery energy plants in their neighborhoods have a powerful new ally: US Environmental Protection Administrator Lee Zeldin.

In this blog, we will explore the key technologies behind battery energy storage containers and analyze the leading advantages of TLS"s battery storage containers.

A new service from Photovoltaik Institut Berlin (PI Berlin) looks to solve a pitfall that often awaits solar industry stakeholders when adding ...

As Berlin accelerates its transition to renewable energy, lithium battery storage systems are emerging as game-changers. This article explores how cutting-edge energy storage solutions ...

Learn how BUNCKER advanced thermal runaway packaging from Berlin Dangerous Goods can mitigate the fire risks of transporting and storing lithium batteries.
