Do I need bidirectional charging?

At the moment, you don't need bidirectional charging. Despite the exciting potential of bidirectional charging, there's a simpler and more immediate solution available: a smart wallbox with dynamic load balancing and flexible tariff charging like our go-e Charger.

How to use vehicle to load bidirectional charging?

Imagine making your morning cup of delicious cappuccino just by connecting a coffee machine directly to your vehicle when camping. To use Vehicle to Load bidirectional charging, you need a normal Schuko socket in the electric car to which you can connect electrical devices on the go.

Are bidirectional charging stations worth the cost?

While a few bidirectional charging stations are available for pre-order (though not currently on sale), promising V2H and V2G capabilities, they might come at a premium price point, with some costing upwards of 20,000 EUR, making them a costly gamble for early adopters.

What are the different types of bidirectional charging?

Bidirectional charging can be broken down into different types, each with its own unique mechanism and purpose. These types of charging include Vehicle-to-Grid (V2G), Vehicle-to-Home (V2H), Vehicle-to-Load (V2L), and Vehicle-to-Vehicle (V2V) charging.

Bidirectional charging unlocks potential savings for vehicle owners in two different ways. First, smart-charging technology, coupled with bidirectional charging, can turn your car ...

Bucharest's District 4 will soon have 50 new high-power charging stations for electric vehicles, mayor Daniel Baluta announced on Wednesday, July 2. Each station will feature two ...

The chargers support two-way DC energy transfer up to 400V, allowing bidirectional capabilities, including V2G and V2H. Additional ...
