The Bucharest Energy Storage Project has emerged as a cornerstone in Eastern Europe's push toward grid modernization. Designed to integrate renewable energy sources like solar and ...

The contract signed by Simtel covers the supply of a battery energy storage system, as well as the design, construction, installation, commissioning, completion, and testing of the ...

Simtel launched the business line dedicated to energy storage systems in 2024, in response to the growing need for efficient management of energy consumption and ...

Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania.

Simtel announces the signing of an EPC (Engineering, Procurement, and Construction) contract with Energy Capital Group, owned by MOGAN Bucharest SRL, part of ...

Simtel launched the business line dedicated to energy storage systems in 2024, in response to the growing need for efficient ...

The contract signed by Simtel covers the supply of a battery energy storage system, as well as the design, construction, installation, ...

The company continues to expand its investment portfolio, which includes the development of a new 200 MW gas-fired power plant and more than 600 MW / 1,200 MWh in ...

The initial EUR860 million will be allocated by the end of the year for key projects including the production and storage of green energy, modernization of Bucharest's metro, and ...

Old-school engineers thought storage meant pumping water uphill. Today's Bucharest energy storage projects use machine learning to predict cloud cover for solar farms.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or ...

As Bucharest aims to achieve 35% renewable energy integration by 2026, the energy storage chassis has emerged as the unsung hero. You know, it's not just about storing power anymore ...
