How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

How much electricity does Cambodia have in 2022?

In 2022, Cambodia's total installed capacity amounted to 4,495 megawatts (MW), while 1,030 MW of power was imported from Thailand, Vietnam, and Laos. The Electricity Authority of Cambodia (EAC) predicts that the total installed capacity will increase to 4,945 MW of electricity in 2023.

Does Cambodia have electricity?

In very remote rural areas, the only source of electricity may be a small portable generator. The Government of Cambodia set a goal of electrifying all villages by 2020 and connecting at least 90 percent of all households to grid-quality electricity by 2030.

Why is electricity so expensive in Cambodia?

Electricity prices in Cambodia are among the most expensive in the region due to a shortage of integrated high-voltage transmission systems and the high cost of imported diesel fuel. Power in provincial cities is more expensive and less reliable than the supply in Phnom Penh.

You can contact us by email at [sales@machinesequipments](mailto:sales@machinesequipments) for reliable Outdoor Substations up to 400 kV supplier, we are well-known for our world-class Outdoor Substations up to 400 ...
