How much does a solar system cost in Canberra?

Solar Choice regularly publishes articles with indicative pricing for PV systems in Australia's capital cities (including Canberra) in our Solar Choice Price Index. Based on the price index data from March 2025, we can see that in Canberra a typical 6 kw solar system would cost \$5,420 on average after deducting the STC rebate and including GST.

Can solar panels save money in Canberra?

With solar panel installation, Canberra households can slash their energy bills by 50-80%. The exact savings depend on system size and location. This complete guide covers the current solar panel prices, solar panel installation costs, and what investing in solar means for Canberra households in 2024.

How much does a 2025 compact substation cost?

Navigating the 2025 compact substation price list doesn't have to be overwhelming. With prices starting at \$6,800 for a 250kVA unit and reaching \$42,000 for a 2500kVA dry-type model, there's a solution for every budget. By understanding factors like capacity, voltage, and features, you can make a smart choice for your project.

Should you install solar panels first in Canberra?

Many solar panels Canberra customers are installing solar panels first to lower power bills and keeping their options open to add a battery once prices come down (we expect they will over the next few years).

With this guide, Canberra residents can maximize their savings, benefit from competitive solar installation prices, and get the most out of their solar power systems.
