-----

The company delivered sodium-ion energy storage cells in bulk to China Southern Power Grid at the end of 2023, and the world's first 10 ...

A new energy storage plant featuring sodium- and lithium-ion batteries has opened in China's Yunnan province.

The immersion energy storage system newly developed by Kortrong has been successfully applied to the world's first immersion liquid cooling energy storage power station, ...

The facility supports more than 30 local wind and solar power stations, alleviating the impact of intermittent supply and facilitating the ...

The station features a domestically developed grid-forming sodium battery system that can intelligently detect grid fluctuations caused by new energy inputs and adjust voltage and ...

In a significant technological advancement, the country's largest "coal-to-power plus molten salt" storage project, located in Suzhou, east China's Anhui province, recently ...

China Southern Power Grid employs a variety of energy storage technologies tailored to meet diverse operational requirements. The most prominent among these are ...

The company delivered sodium-ion energy storage cells in bulk to China Southern Power Grid at the end of 2023, and the world's first 10-MWh sodium-ion battery energy ...

Discover how advanced energy storage containers are revolutionizing grid management and renewable energy
