TAU is a critical key infrastructure asset for Rarotonga and the wider Cook Islands. The primary function of Te Aponga Uira (TAU) is the ...

TAU is a critical key infrastructure asset for Rarotonga and the wider Cook Islands. The primary function of Te Aponga Uira (TAU) is the provision of electricity to the people of ...

Distribution of wind potential Annual generation per unit of installed PV capacity (MWh/kWp) Wind power density at 100m height (W/m²)

Dataset description: Report published under the PIEPSAP Project via the collaboration of SOPAC, UNDP, European Union and the Government of Denmark. This report is based on ...

Learn how Beca helped the Cook Islands realise their aim of achieving 90% of their power needs from renewable sources by 2020, a great example of government renewable energy at work!

Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, [1] with an initial goal of ...

Report on the viability of constructing turbine platforms and an access road for a wind farm at the proposed Kiikii location.

The Pacific Islands Forum Secretariat's wind and solar monitoring project is the main long-term data source for Rarotonga wind energy and is used to estimate wind regimes of other islands.

Learn how Beca helped the Cook Islands realise their aim of achieving 90% of their power needs from renewable sources by 2020, a great example of ...

Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce ...

At present wind energy is considered to be the most attractive renewable energy source for grid connected electricity supply in the Cook Islands. For the Rarotonga system, wind energy ...

To support the Cook Islands Government, the New Zealand Government - through the Ministry of Foreign Affairs and Trade, installed mini-grid photo-voltaic power systems in a number of ...
