---

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW ...

Croatia experienced accelerated growth in renewables over the past year, yet the sector faces critical bottlenecks. By the end of 2024, the country had reached 3.8 GW of ...

Croatia now has over 26,000 solar plants connected to the grid, totaling 872.1 MW, putting it on track to surpass 1 GW this year. Current capacity includes 655 MW on ...

Renewable sources supply around 30% of Croatia's energy needs, but only two percent is solar energy. The potential for solar energy is estimated at 6.8GW (majority in utility-scale or ground ...

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in the country's renewable energy journey.

In 2025, Croatia achieved a significant milestone by surpassing 1 GW of installed solar capacity, marking a pivotal moment in ...

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW milestone in May.

Croatia installed a total 397 MW of solar in 2024, bringing its cumulative capacity to around 872 MW, and surpassed the 1 GW milestone in May. If the trend seen in the first half ...

Croatia's solar energy sector has been supported by a range of government policies and incentives, including feed-in tariffs, tax exemptions, and subsidies. These ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

According to an analysis by the Energy Institute Hrvoje Pozar (EIHP), Croatia ranks among the leading European Union countries in terms of the share of renewable energy in ...

Croatia crossed the 1 GW milestone in May 2025 and, if current trends persist, could reach 1,290 MW by December 2025. The self-supply sector, particularly households and ...
