How will the DRC meet the ELEC-Tricity challenge?

The DRC aims to connect 32% of the country to elec-tricity by 2030. Meeting this challenge will require co-ordinated efforts from various stakeholders, support-ive policies and regulations, and technical assistance support to prospective projects in order to attract in-vestments.

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available here. The Democratic Republic of Congo's national electric-ity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million house-holds,only 1.6 million have have access to electricity.

How has DRC benefited from a grant-making and concessional financing scheme?

DRC has benefited from several grant-making and concessional financing schemes that have helped to unlock private capital for the off-grid solar sector. In 2021,the Swedish investment platform (Trine) en-tered a partnership with Altech,a leading company in the distribution sustainable energy products and ser-vices18.

What is the role of Anser & are in the DRC?

To strengthen legal and regulatory framework and catalyze private and public investment flow to the sector (including off-grid solar energy),The DRC gov-ernment established two agencies: ARE,which will be the autonomous regulatory agency; and ANSER,which is responsible for rural electrification through-out the DRC's vast territory.
