-----  
How much electricity does Timor-Leste use?

Timor-Leste consumes 125 GWh of electricity per annum, an average of 95 kWh per person. The country has about 270 MW of electricity capacity, 119 MW in the city of Hera. Most of the energy infrastructure was destroyed by the Indonesian militias during the 1999 East Timorese crisis.

What is the energy landscape in Timor-Leste?

Timor-Leste's energy landscape is characterized by a growing demand for electricity and a heavy reliance on imported fossil fuels. In 2022, almost all of the electricity being generated came from oil or other fossil sources. While 100% of the population have access to electricity, only 18% have access to clean cooking.

What is Timor-Leste's energy plan?

Program of the 9th Constitutional Government: The Government is committed to modernize and expand its energy system by utilizing renewable energy. Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030.

What will Timor-Leste's energy policy look like in 2021?

Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030. Under the current policies, GHG emission from the energy sector are expected to drop by 30% by 2030, compared to the BAU level.

In addition, the benefit of implementing renewable energy in Timor-Leste can produce job creation, landowner income, reduce energy ...

Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030.

A study was done, at the national level, which will allow the development of an energy policy for Timor-Leste. The study was concluded on the 29 May and analysed several sources available ...
