-----

Cebu enjoys a tropical climate with year-round sunshine, making it an ideal location for solar power generation. With an average of 4.5 to 6 hours of sunlight per day, solar ...

MANILA, Philippines -- A floating solar power plant on a reservoir in Cebu has begun supplying energy to a copper mine, marking the country's first megawatt-scale deployment of the ...

In order to accommodate energy storage as an enabler for the modernisation of its electricity networks, the Philippines' Department of Energy (DoE) has issued a circular, "Providing a ...

As the Philippines embraces renewable energy and seek sustainable development, the need for efficient and reliable solar-plus-storage solutions has become increasingly urgent.

The passage of Republic Act No. 11234, entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March 2019 paved the way for streamlining and expediting the permitting ...

Local energy suppliers are considering adding battery storage setups to enhance their energy initiatives by storing surplus solar power generated in the daytime for ...

As Cebu accelerates its transition to renewable energy, demand for efficient energy storage systems has skyrocketed. This article explores how cutting-edge battery technology addresses ...

To mitigate these effects and ensure greater energy production, appropriate measures can be taken during installation such as securing panels with robust mounting systems and ensuring ...

This addition highlights a growing trend in modern grid management, allowing for the storage of solar energy
