Why did the new energy plan not work in Ecuador?

The belief that promoted this new Plan was that the market,through its own forces,principles and dynamism,would encourage new companies to invest in electricity generation. However,the results were not satisfactory in Ecuador due to bothinsufficient interest of new companies and lack of fresh capital( CONELEC,2007a ).

Will Ecuador's energy shortage cause a recurrence of power outages?

Ecuador's energy shortage could result in a recurrence of power outages,particularly in the dry season of September through December. Ecuador has added minimal generation in recent years. In 2020,the Energy Ministry awarded two projects to the private sector: a 110MW wind farm (Villonaco),and a 200MW solar plant (El Aromo).

How much electricity does Ecuador need?

Ecuador had a peak demand of 5,110 MW in May 2025,and according to CENACE,electricity demand grows by 360 MW every year. Ecuador's energy shortage could result in a recurrence of power outages,particularly in the dry season of September through December.

Does Ecuador need a balance between public and private investment?

During several years,Ecuador's energy sector was composed mainly by public utilities; however,there is the necessityof pursuing a balance between public and private investment in the energy sector. The new policies have been conceived for achieving this important challenge.
