Does ESS tuning S550 GT have a supercharger?

No problem, call us or email us and we will get it processed. The intercooled ESS Tuning S550 GT 5.0 supercharger system is the culmination of over 25 years of forced induction experience. The G2 supercharger has a max capacity of 1300CFM, and is ideal for the Coyote application in power ranges of 575-800WHP.

What is an ESS supercharger system?

The ESS Supercharger system has been developed to meet the demands of today's motorists and the increasingly stringent requirements concerning environmental emissions. The objective established by ESS at the start of our product development was to create systems designed consistent with the most modern concepts of automotive supercharging.

How much power does an ESS N52 supercharger make?

Depending on the original kit, the ESS vortech based N52 supercharger kits come with 120/115mm pulleys. They make between 210-270whp with the supplied ESS tune and hardware. We have come up with upgrade packages to take these cars to 300-400 whp. You can read our blogs to find out about results on our prototype cars here: Stage 2, Stage 3.
