Estonia's Energiasalv has secured EUR 11 million (USD 12m) in additional financing for its 500-MW/6-GWh pumped hydro energy storage project, including strategic investments from ...

While short-term storage plays a vital role in balancing daily electricity demand, long-term storage solutions are needed to address increasing renewable energy production. ...

Spanning 600 hectares--an area comparable to 1,200 football fields--the vast project will include a 600 MWh energy storage system to ensure a stable power supply even ...

The country's climate minister, Yoko Alender, emphasised the role of storage systems in this transition, saying they would help ensure a "clean, reliable and affordable energy future" for ...

Construction has begun in Estonia on two energy storage facilities with a total capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took ...

Estonia's solar sector has experienced explosive growth, with 513 MW added in 2024, but the country now faces new hurdles. Market saturation, grid infrastructure limitations, ...

As we approach 2025's energy crunch season, Tallinn's storage fleet stands ready to power 63,000 homes through 72-hour outages. Not bad for a city that only started its storage push in ...

While short-term storage plays a vital role in balancing daily electricity demand, long-term storage solutions are needed to address ...

Estonian Ministry of Economy will provide EUR 9.6 million to companies producing energy from renewable

sources to invest in heat and electricity storage. Beneficiaries can draw up to one ...

This paper analyses the potential of using batteries to meet the minimum energy performance requirements for buildings in Estonia. The study uses both current and the forthcoming edition ...

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and ...
