Do EV charging stations need a good charging infrastructure?

As electric vehicle (EV) adoption accelerates, the need for efficient and reliable charging infrastructure becomes increasingly urgent. However, the current pace of charging station installations often lags behind the rising demand for EV charging, leading to concerns about the balance between EVs and available charging infrastructure.

How many EVs can a Fellten charge Qube charge?

Fellten offers the Charge Qube in three variants: an energy storage-only unit provides off-grid power solutions; a Type 2 AC charging version is aimed at fleet users and capable of charging up to 12 EVs simultaneously at a rate of 7kW per-port.

How many kWh can a 20ft container hold?

Larger 20ft containers can store up to 900kWh, supporting overnight AC charging for multiple vehicles (up to 12 at 7kW per port) and a rapid 22kW daytime top-up option. For fast charging, the Qube can also be equipped with a pair of 240kW CCS chargers, supporting both 400V and 800V charging.

As the demand for EVs continues to rise, the need for accessible and efficient charging infrastructure becomes paramount. Portable solutions like those developed by ...

With a BESS in place, charging stations can provide more power to vehicles without needing a direct increase in grid capacity. This ...

"By leveraging second-life EV battery packs and modular containerised design, we are delivering a cost-effective, scalable product ...

As a cutting-edge Mobile Charging and Energy Storage Container, the iMContainer is designed to meet a wide range of energy demands while promoting sustainability.

Need a solution for EU mobile EV charging? BESS Container for EU Mobile EV Charging Vans delivers compact 10-30 kWh power, 50-150 km range per charge, and 70% ...

"By leveraging second-life EV battery packs and modular containerised design, we are delivering a cost-effective, scalable product that supports businesses and public ...

Fast chargers are essential for the quick recharging of battery-electric vehicles (BEVs), playing a vital role in supporting long-distance travel and reducing range anxiety, according to the new ...

With a BESS in place, charging stations can provide more power to vehicles without needing a direct increase in grid capacity. This allows for faster charging, even in areas where ...

EV specialist Fellten has launched a new all-in-one charging system designed to speed up the UK's electric transition by removing the need for planning permission. The ...

This article breaks down how BESS containers aren't just fixing charging bottlenecks--they're accelerating Europe's EV revolution, with a peek at future V2G magic and ...

To get around these problems, Bristol-based electric car specialist Fellten has developed a "portable" EV charger solution that makes use of recycled electric car batteries ...

EV specialist Fellten has launched a new all-in-one charging system designed to speed up the UK's electric transition by removing the ...
