Should ISC agreement structure be adopted for initial procurement of utility-scale energy storage resources?
Should ISC agreement structure be adopted for the initial procurement of utility-scale energy storage resources. Given the successful implementation of CfD in Illinois RPS and their ability to provide a balanced approach to risk allocation, as well as the condensed timeline to conclude the initial procurement

What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.

Does the Pu's energy storage procurement framework support workforce development?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. In this section, we describe evidence of workforce development with a focus on the energy storage supplier activity.

When will the energy storage projects be installed?

The energy storage projects will be installed by the end of 2024. In 2013, the CPUC issued Decision 13-10-040 and directed California's three large investor-owned utilities to procure 1,325 megawatts of energy storage by 2020.

Abstract tes Alliance with Sandia National Laboratories and Bright Power. They are intended to support Massachusetts Department of Energy's Community Clean Energy Resilience Initiative ...

On the supply side, as noted above, the Uyghur Forced Labor Prevention Act may limit the ability to import equipment required for battery energy storage projects and the risks ...

The stakeholder questions below are intended to guide the RFP Drafting Parties in navigating these often-competing considerations. Both types of energy storage systems play a ...
