The Program is administered by the Inter-American Development Bank (IDB), and aligns with Guyana's Low Carbon Development Strategy. The initiative emphasizes climate-resilient ...

This development represents Guyan's first utility-scale solar PV and BESS investment and mark a significant milestone in the country's renewable ...

With a peak capacity of 750 kilowatts (kWp), the facility integrates advanced photovoltaic modules, intelligent inverters, and robust battery storage. This hybrid system ...

Rows of solar panels now cover former cane fields in rural Hampshire, marking another major step in Guyana's drive to cut emissions, lower energy costs and expand clean ...

The Program is administered by the Inter-American Development Bank (IDB), and aligns with Guyana's Low Carbon Development Strategy. The ...

Explore how Guyana's solar energy installation of 4.8 MW is transforming communities through eco-friendly power solutions and paving the way for sustainable living.

Solar power generation via photovoltaic (PV) farms is leading the way in the government's multi-pronged efforts to reduce greenhouse ...

As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh. In Guyana, solar energy is used for several purposes, ...

Yet this provision appears insufficient, with Guyana Power and Light (GPL) reportedly responsible for up to

30% of monthly operational costs. This structure raises serious ...

This development represents Guyana's first utility-scale solar PV and BESS investment and mark a significant milestone in the country's renewable energy transition.

Solar power generation via photovoltaic (PV) farms is leading the way in the government's multi-pronged efforts to reduce greenhouse emissions and transition Guyana to sustainable sources ...

This report looks at how Guyana is acting on that idea. It uses research from the Guyana Energy Agency (GEA). Guyana is scaling solar power. It is also helping homes and ...
