Based on this analysis, a detailed technical concept for the first pilot ATES in the Vienna area will be developed, considering the utilization of existing hydrocarbon wells and new drilled wells.

The TREASURE project was presented at the Seasonal Large-Scale Heat Storage Systems symposium in Vienna, showcasing groundbreaking demonstrations in underground ...

The decision to transform the stadium into an emission-neutral venue was made by the Vienna City Council in November 2023. The ambitious project includes the installation ...

The further development and practical testing of storage technologies should be accelerated in the next few years in order to open up new areas of application, such as high-temperature, ...

Eaton xStorage Buildings energy storage systems can bring many operational and financial benefits to owners and operators of stadiums and arenas. Eaton would be delighted to carry ...

The project investigates the integration of aquifer thermal storage systems into district heating networks. The aim is to design the first technical pilot plant in Austria.

From a technological point of view, large-volume underground storage tanks are the best option for such seasonal storage. One such large-volume underground storage solution is Aquifer ...

It can achieve high roundtrip efficiencies of over 50% with low energy losses as it converts electricity into heat and back into electricity (Smallbone et al., 2017).
