---

Reflective glass, also referred to as solar control coated glass, is a specialized type of glass produced by depositing thin layers of metal or metal oxide films onto its surface.

Solarcool(R) glasses can be glazed with the reflective coating positioned on either the first or second surface. The glass has improved performance and higher exterior visible-reflectivity ...

Elevate your building's efficiency with our high-quality solar control glass designed for heat reflection and UV protection. Perfect for both residential and commercial applications, our solar ...

Reflective glass, also referred to as solar control coated glass, is a specialized type of glass produced by depositing thin layers of metal or ...

Solarcool(R) glasses can be glazed with the reflective coating positioned on either the first or second surface. The glass has improved performance ...

Reflect beauty and performance with Solarban(R) R67, R77 and R100 reflective glasses. Whether your project requires a reflective, understated aesthetic or a highly durable reflective coated ...

REFLECTASOL(R) is a reflective, solar control glass, carefully designed to meet two requirements of architects: heat resistance on the inside and great exterior appearance, for better living and ...

SunGuard(R) Solar is a commercial solar control glass that helps to reflect the sun's energy. Making it ideal for applications when excessive solar heat gain could result in uncomfortable ...

Pilkington Eclipse(TM) Silver is an on-line coated, highly reflective solar control glass offering good light transmittance, medium solar control with an ...

The developed low-emissivity (low-e) passive insulation composite film demonstrates enhanced spectral characteristics. It achieves a solar transmittance of 0.836 ...

Pilkington Eclipse(TM) Silver is an on-line coated, highly reflective solar control glass offering good light transmittance, medium solar control with an external light reflection of 34%.

Solar reflective glass, often referred to as "solar control glass," is a specialized type of glass designed to reflect a significant portion of the sun's heat and UV rays. It typically ...
