-----

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity--enough to power 20 million homes--to ...

From 2018 through mid- 2025, battery storage capacity in California increased from 500 megawatts (MW) to more than 16,900 MW. The state ...

California continues to lead the world in energy storage deployment. The California Energy Commission (CEC) has released an updated Energy Storage System ...

Battery storage in the state has grown more than 3,000% in six years -- from 500 megawatts in 2020 to more than 15,700 megawatts ...

The federal Energy Information Administration estimates that the U.S. now has close to 30 GW of utility-scale battery capacity alone, ...

The federal Energy Information Administration estimates that the U.S. now has close to 30 GW of utility-scale battery capacity alone, not counting other commercial, industrial ...

From 2018 through mid- 2025, battery storage capacity in California increased from 500 megawatts (MW) to more than 16,900 MW. The state projects 52,000 MW of battery storage ...

The American Clean Power Association reported that the United States added a record 1,602-MW of battery storage capacity in the ...

Generators added 10.4 GW of new battery storage capacity in 2024, the second-largest generating capacity
