In 2024, around 125 new hydrogen refuelling stations were opened worldwide: 42 in Europe, around 30 in China, 25 in South Korea, 8 in Japan and 13 in North America.

To find the real-time availability status of the HRS in Europe, please visit [HRS Availability Map](#). Get latest insights into publicly accessible and operational hydrogen refuelling stations in ...

The Central European Hydrogen Corridor (CEHC) initiative was launched in 2021 by four gas infrastructure companies (OGE, NET4GAS, eustream, Gas TSO of Ukraine) driven ...

In 2023, 37 new hydrogen filling stations were opened in Europe, twelve more in Japan, 29 in South Korea and seven in North America. 92 per cent of the new European ...

To find the real-time availability status of the HRS in Europe, please visit [HRS Availability Map](#). This site is managed by the Clean Hydrogen Partnership under a public procurement.

The first results are positive and indicate that it is technically feasible to transport up to 144 GWh of H₂ per day or 1.5 million tonnes per year through Central Europe by 2030.

The European Hydrogen Refuelling Stations (HRS) Availability System was set up by the Clean Hydrogen Partnership to provide reliable data on European HRS. The system monitors a ...

London, 24th May 2024 - By the end of 2023, a total of 1,068 hydrogen refueling stations (HRS) were in operation in 35 countries worldwide, as growth of hydrogen-powered transport ...

In 2024, around 125 new hydrogen refuelling stations were opened worldwide: 42 in Europe, around 30 in
