How much does a solar storage system cost?

The exact amount depends on how much work your solar installer needs to do, like connecting the battery to your solar panels or setting up multiple batteries. This can vary from one homeowner to another. Most homeowners pay between \$6,000 and \$12,000 for a solar storage system, including the battery and installation.

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

How much does a solar battery cost in 2025?

In 2025, a typical solar battery installation costs \$9,000-\$18,000 before incentives and \$6,000-\$12,000 after credits. By 2026, continued cost declines are expected to make home energy storage even more accessible, with prices averaging 8-12% lower than current levels.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. *The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

But how much does home battery storage cost? In this article, we'll explore solar battery prices and six factors that influence the cost of installing a battery.
