---

By introducing a solid-state battery that promises an unprecedented 1,864-mile range with just a five-minute charge, Huawei is not only setting new benchmarks but also ...

Huawei's DriveOne motor has entered the arena of new energy electric vehicles, and it demonstrates remarkable engineering. ...

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres ...

By introducing a solid-state battery that promises an unprecedented 1,864-mile range with just a five-minute charge, Huawei is ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra ...

Huawei DriveONE 3-in-1 ePowertrain 150kW combines a motor control unit (MCU/inverter), PMSM, and gearbox to improve the efficiency, ...

Huawei's DriveOne motor has entered the arena of new energy electric vehicles, and it demonstrates remarkable engineering. While it may have slight differences compared to ...

Huawei's DriveONE power domain convergence solution was also introduced, aiming to integrate power generation, storage, and consumption for EVs. This holistic ...

Huawei DriveONE 3-in-1 ePowertrain 150kW combines a motor control unit (MCU/inverter), PMSM, and gearbox to improve the efficiency, performance, and reliability of electric vehicles.

In 2020, Huawei introduced its first highly integrated power domain solution, DriveONE. In 2021, it launched the industry's first high-voltage platform for fast charging, which ...

AI flash charging with full-stack high voltage design to enhance driving experience. X-in-1, hyper-converged architecture for ultra-fast charging. A seamlessly integrated solution that combines ...

This report is based on the content of Huawei's press conferences and the Auto Shanghai 2025, and introduces Huawei's intelligent driving systems, cockpits, and ...
