EirGrid is rolling out an unprecedented programme of grid reinforcements, upgrades and new infrastructure across the country, enabling the connection of further generation sources to ...

In February 2024, ESB Networks announced that over 1GW (1,000MW) of solar is now connected to the Irish grid at utility scale and behind the meter - enough to power around ...

Ireland's solar energy increased by 49% in the last year and by 160% since 2023, new figures show today. Solar Ireland said solar power is now meeting the electricity needs of ...

Despite the promising growth, Ireland currently remains well behind its 2030 target of 8 GW of installed PV. Its total installed solar ...

On March 25th, 2025, Ireland reached a new record for grid-scale Solar power, generating over 750 Megawatts (MW) at one point, 18 MW more than the previous peak set in July 2024. This ...

Ireland's energy regulatory body, the Energy Regulatory Commission (CRU), and the government have announced an investment plan totaling EUR18.9 billion (approximately US\$22.

Despite the promising growth, Ireland currently remains well behind its 2030 target of 8 GW of installed PV. Its total installed solar capacity was 1.76 GW at the end of May.

In March, Ireland's electricity grid hit a new solar power record, with a peak of 750 MW connected to the system. The figure marks a key milestone towards the country's 80% ...

Solar remains Ireland's fastest connecting renewable energy resource, with approximately 950 rooftop systems coming online week and a pipeline of over 21 GW of solar and solar-hybrid ...

This blog explores the impact of changing weather trends and emerging innovations on Ireland's solar energy capacity. From the Climate Action Plan (CAP) and updated policy ...

The capital city has become Ireland's solar showcase, with three large-scale solar farms now feeding the national grid. These installations not only reduce fossil fuel dependence ...
