What is a containerized energy storage system?The Containerized energy storage system refers to large lithium energy storage systems installed in sturdy, portable shipping containers, which ...

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, ...

With a location secured for a new solar module factory in Latvia, a robust business plan, and financing in place, the next critical question shifts from finance to logistics: Where will ...

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia.

Clean energy investment company Niam Infrastructure and Estonian renewable power developer Evecon have announced plans to ...

Clean energy investment company Niam Infrastructure and Estonian renewable power developer Evecon have announced plans to build a new solar-plus-storage portfolio in ...

Jun 19, Latvia's Energy Strategy outlines major changes in renewable energy production and storage, with significant investments planned in wind, solar, biomass, and biogas, as well as in ...

From residential battery walls to 100MW grid-scale installations, Latvian power storage manufacturers deliver solutions that balance innovation with practicality.

Perfect for long-term rural microgrid systems, solar-powered telecom relay stations, or infrastructure camps.
