-----

A significant challenge for renewable energy in Micronesia is building and retaining technical capacity, to not only operate but maintain solar PV electrical generation systems.

A tender is open in Micronesia for the engineering, procurement and construction of hybrid solar minigrid systems at three villages on the Fefen Islands. The closing date for ...

The Federated States of Micronesia are investing in solar micro-grids and battery energy storage systems as well as capacity building to increase self-sufficiency and reduce ...

A total of 10 feasibility studies are being carried out across 10 separate islands in the Chuuk group of the Federated States of ...

PEPP's innovative and collaborative approach to problem-solving is reflected in its inaugural project, which will address the long-term electrical power ...

Sky Ranch Solar Energy Center -- a 1,600-acre solar farm, with a 190-megawatt solar array and 50-megawatt, four-hour battery energy storage system -- was officially commissioned and ...

The Federated States of Micronesia is making impressive progress in the implementation of their grid connected solar power generation systems funded through the ...

The solar microgrid system tender covers the engineering, procurement and construction of the hybrid PV systems, inclusive of training and the supply of materials for low ...

PEPP's innovative and collaborative approach to problem-solving is reflected in its inaugural project, which

will address the long-term electrical power needs of the State of Pohnpei, in the ...

New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas ...

A total of 10 feasibility studies are being carried out across 10 separate islands in the Chuuk group of the Federated States of Micronesia. These studies will determine the best ...

Currently, almost all of the electricity produced in Micronesia is dependent upon imported petroleum based fossil fuels, with some solar photovoltaic systems in operation.
