Council discussed and advanced a purchase/lease agreement with ING for a solar energy and storage project on the Mountain Avenue Reservoir roof that will generate about ...

A California neighborhood where blackouts vanish like morning fog, and businesses slash energy bills while sipping organic almond milk lattes. That's the reality taking ...

The shared energy storage station consists of energy storage batteries and inverter modules, while the microgrid consists of already constructed equipment, including distributed ...

But here in Monrovia, something electrifying is happening. Shared energy storage systems (ESS) are transforming how we store and distribute power, turning our community ...

Ever wondered how cities like Monrovia can transition from fossil fuels to renewable energy without blackouts? The answer lies in robust energy storage feasibility studies.

Liberia Electricity Corp. (LEC) is seeking consultants to develop a 15 MW/10 MWh solar-plus-storage installation at Roberts International Airport near Monrovia, Liberia's capital city.

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW.

Monrovia's newly approved new energy storage project isn't just another battery installation--it's a glimpse into how cities worldwide are tackling climate change.

When Monrovia's city council dropped its shared energy storage announcement last week, even the local
