-----

The main focus of the project is the solar PV technology and the nature of mini-grids. In the policy framework of Myanmar, the primary purpose of mini-grids is to fill the time ...

This paper aims to describe the high potential of solar energy, current situation of solar energy implementations and the important of ...

This study investigates public acceptance of photovoltaic (PV) solar energy in Myanmar using the Theory of Planned Behavior (TPB), focusing on various demographic ...

To accelerate the development of solar energy in the country, Myanmar needs to improve renewable energy governance, build an effective regulatory framework for renewable energy ...

Businesses switching to solar typically reduce their energy costs by more than 50%. Through Smart Power Myanmar, we provide technical planning and support to small-to ...

Myanmar presents a burgeoning opportunity for investment in renewable energy, particularly in solar photovoltaic (PV) projects and Battery Energy Storage Systems (BESS).

To ease the challenges currently faced in improving people's livelihoods and fostering economic development, citizens are using individual, small, and medium-scale ...

This growth highlights the increasing use of solar energy in the Southeast Asian country, she added. Solar installations have been growing each year. They are more widely adopted in both ...
