-----

Statera Energy has acquired a 680MW battery energy storage system project in north-west England.

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.

In a report released this week, the NWEA said hydrogen-to-power (H2P) represents a "unique opportunity" to decarbonise the UK energy system while "driving economic growth ...

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from Cornwall Insight.

HyNet is an extensive carbon capture and storage network featuring 61km of pipeline between developments that will produce and distribute low-carbon hydrogen across ...

Work has begun on a GBP300m energy plant which will store surplus electricity from wind and solar farms in the form of liquid air. The facility at Carrington near Manchester, ...

Discover the biggest commercial battery storage UK projects in 2025, including NatPower's Teesside GigaPark, Statera's Carrington, RES's Coalburn etc.

HyNet is the most advanced hydrogen and carbon capture, utilisation and storage (CCUS) project in the UK. It is a low cost, deliverable project which meets the major challenges of reducing ...

One of UK's largest battery energy storage projects has changed hands and will come online next year as part of a low carbon energy park in Greater Manchester. UK-based ...
