Explore how EE North America is driving the energy transition with advanced battery storage solutions. Learn how our projects store renewable energy, enhance grid stability, and support ...

After China, the US now gets its first grid-level energy storage system with sodium-ion batteries that require no active cooling and cost a third less than a traditional BESS with ...

Historic amounts of energy storage, primarily lithium-ion battery systems, are being added to the U.S. grid, driven by a need to balance renewable generation and to meet load ...

Energy storage technology is key to securing energy dominance and bolstering national security. Advances by this NSF Engine will be essential to ensuring that transition is ...

Looking ahead, the North American energy storage sector is poised for transformative change, driven by technological advancements, favorable regulations, and an ...

As the United States retreats from its investment in the energy transition, Canada and other countries are stepping up their efforts to invest in and grow their energy storage ...

Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project ...

In April of 2025, the energy storage industry announced a commitment to invest \$100 billion into building and buying American-made batteries. This commitment is expected to generate more ...

The North American Battery Energy Storage System Market is segmented by battery type, connection type, component, energy capacity, end-user, and geography. By ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...
