Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.

Is North Macedonia a good candidate for smart siting?

Seeing the country's forward-thinking approach to renewables and natural beauty, The Nature Conservancy (TNC) identified North Macedonia as a prime candidate for the implementation of the smart siting approach currently being undertaken in Croatia and Serbia as well.

Hybrid Energy Solutions for mobile communication sites, utilizing wind, solar, and diesel power for reliable, continuous energy. Whether you need a grid-tied, off-grid, or hybrid system, with or ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Luxembourg-based Zen Energy Group has started the installation of a hybrid energy project in North Macedonia, combining a solar power plant and a battery energy ...

Emerging markets are adopting cabinet storage for residential energy independence, commercial peak shaving, and emergency backup, with typical payback periods of 2-4 years.

With global energy storage expected to grow to \$546 billion by 2035 [3], this project positions North Macedonia as a regional leader. Let's unpack why tech enthusiasts and ...

Luxembourg-based Zen Energy Group has started the installation of a hybrid energy project in North Macedonia, combining a ...

This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to maximize its potential.

The initiative undertaken in North Macedonia is a template that can be scaled and replicated across the region, provided there is robust political commitment and a clear ...

Meet Zoran from Negotino, who installed Macedonia's first solar + storage microgrid in 2023. His 200 sheep now graze under solar panels that power both the farm and ...

Unlock groundbreaking insights into solar technology advances and installation strategies, designed exclusively for EPCs, planners, and investors.

A subsidiary of Con Edison Clean Energy Business acquires an 85% stake in North Macedonia's largest solar-plus-storage project. Learn how this move impacts the region's ...

The initiative undertaken in North Macedonia is a template that can be scaled and replicated across the region, provided there is robust ...
