China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

In this week's Caixin energy wrap, we analyze China's biggest climate and energy news on policy, industry, projects and more: o Renewables to get market-based prices. o ...

China's solar and windfarms would no longer be guaranteed sales at a fixed price linked to coal benchmarks, under a new policy released by the central government. The policy ...

For the past year and a half, Chinese manufacturers have been selling solar modules and storage systems at rock-bottom prices, trying to move oversupply even while ...

Solar power prices in China's first provincial auction under its new renewable pricing mechanism were so low they could discourage ...

For the past year and a half, Chinese manufacturers have been selling solar modules and storage systems at rock-bottom prices, trying to ...

This policy promotes the full market-based determination of on-grid electricity prices for new energy sources, including ground-mounted and distributed PV projects, as well ...

China's solar and windfarms would no longer be guaranteed sales at a fixed price linked to coal benchmarks, under a new policy ...

The analysis reveals that three converging factors -- polysilicon consolidation, supply-side production cuts,

and the cancellation of China's 13% VAT export rebate -- will ...

China is transitioning to a market-driven framework for solar energy pricing, with the change set to take effect by June 1, 2025. The ...

China is transitioning to a market-driven framework for solar energy pricing, with the change set to take effect by June 1, 2025. The National Energy Administration (NEA) has ...

China will replace its feed-in tariff (FIT) system with a fully market-driven renewable energy pricing model by June 2025, shifting ...
