Can a liquid cooling battery energy storage system improve energy reliability in Panama?

On October 18, 2024, a 372kWh liquid cooling battery energy storage system (BESS) was successfully installed in Panama. GSL Energy, a China-based manufacturer specializing in energy storage solutions, purchased the system. This project aims to enhance energy reliability and efficiency in Panama's energy grid.

What is the Panama 372kWh outdoor liquid cooling battery energy storage system?

The Panama 372kWh Outdoor Liquid Cooling battery energy storage system (BESS) project demonstrates the successful deployment of cutting-edge energy storage technology in a challenging environment. This installation serves as a model for future projects aiming to enhance energy resilience and sustainability in the region.

How does AES work in Panama?

AES Panama owns and operates 1,141 MW of power generation facilities in Panama. The company delivers on its commitment of improving lives by developing greener, smarter, and more sustainable infrastructure and energy solutions that the country needs. Through these efforts, AES Panama has reduced the emission of approximately 16 million tons of CO₂.

How does Colón work?

Colón uses a technology of combined cycle to achieve a higher efficiency and less environmental impact. It reuses the gases released from the turbines to obtain steam that is later used to move an additional turbine. It is 50% more efficient and requires one third of the water from traditional plants.

This acquisition helps strengthen and diversify the portfolio of AES in Panama through the integration of renewable energy and reaffirms our commitment to the country.

HLC Sheet Metal Factory has extensive experience in the manufacture of outdoor enclosures, enabling us to meet the diverse needs of energy storage enclosure customers across a range ...
