How does community solar work?

Participation in community solar is always by choice. Subscribers opt into the program, either through contractual payments or some non-financial transaction. All community solar products convey some part of the financial benefit to subscribers.

How does a community solar subscription work?

HOW A COMMUNITY SOLAR SUBSCRIPTION WORKS A subscription to a solar energy system is a contract to allocate a share or portion of power generated by an energy system located at a location different from your property. This is typically i

Who are the subscribers of a community solar project?

The subscribers are the individuals, businesses, nonprofits, or local governments, that purchase a share of the electricity generated by the community solar project. A community solar project is not located at the house or business where the subscribers use electricity.

How many MW is community solar?

The amount of community solar (measured in megawatts) more than doubled, on average, each year between 2010 and 2021. About 1800 MW came online in 2021 alone. What is Community Solar? Community solar allows multiple customers, or "subscribers", to purchase the output from a single solar photovoltaic array.

Community solar arrays have multiple subscribers who receive benefits on utility bills that are directly attributable to the solar project's energy generation. There are no upfront costs to ...

the form of a monthly subscription fee. By entering into a subscription agreement for a community solar energy system, you will receive a credit on your utility bill. Electricity from a community ...

In a new report for the National Community Solar Partnership (NCSP+) program, national lab researchers explore the issues around consolidated billing, including costs and ...
