Are mobile operators building 5G networks in Poland?

Mobile operators in Poland have been testing 5G technology and have begun preparations for building 5G networks. While early pilot projects were mostly based on Huawei technology, in later initiatives the operators have focused on Ericsson and Nokia.

Does Poland have a 5G network?

While investments in DSS and the mid-band rollout have enabled Polish operators to make significant strides in 5G availability, which increased nationally from 28.5% in Q1 2024 to 43.1% in Q1 2025, regional coverage disparities continue to be a feature of the mobile network experience in Poland.

When will SA 5G be available in Poland?

Deployment of SA 5G networks has still not occurred in Poland and is not expected before 2026, according to the latest announcements made by the President of Orange. For now, the operator is focusing on expanding coverage by stations that share LTE and 5G.

Where is 5G deployed in Poland?

Operators have prioritized 5G deployments in the richest and densest parts of Poland where fiber is heavily deployed, including the Masovian (Warsaw) and Pomeranian (Tri-City) provinces.

Play expands its network with nearly 10 new 5G-ready base stations across Poland, enhancing connectivity in underserved areas and supporting the country's digital ...
