What is a Powerpact circuit breaker?

A flexible, high-performance offer, certified to global standards from 100 to 1200 A. The PowerPacT M-frame, P-frame, and R-frame circuit breakers are designed to protect electrical systems from damage caused by overloads and short circuits. These breakers are available with Micrologic electronic trip units. Also available in I-line construction.

What does a circuit breaker do?

Circuit breakers perform 3 key functions: protection, switching, and monitoring. Circuit breakers are designed to "break" (discontinue) the flow of electricity to protect people and equipment when current reaches an unsafe level due to overload, short circuit, or other electrical faults.

What voltage is a RCBO circuit breaker?

Voltage ratings at 125/250VAC, 32VDC or 125/250VAC, 50VDC with AIC's of 1,000 or 2,500 amps. AC Residual Current Circuit Breakers with Overcurrent Protection (RCBO) combine ground fault protection with the familiar overcurrent tripping characteristics of a normal circuit breaker. Options from .10 to 50 amps.

What is a Powerpact 500 VDC molded case circuit breaker?

PowerPacT 500 Vdc molded case circuit breakers are designed per UL Supplement SC for use in an ungrounded dc system using an uninterruptible power supply (UPS), with a nominal voltage of 500 Vdc or a maximum (floating) voltage of 600 Vdc. Available for surface, flush, or DIN mounting.

ABB's Low Voltage Products (LVP) division manufactures low-voltage circuit breakers, switches, control products, wiring accessories, enclosures and cable systems to protect people, ...
