What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a EUR1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

What is Poland doing about energy storage?

Poland has just rolled out one of Europe's most ambitious energy storage programmes- a EUR980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage capacity by 2028.

Does Poland have a new energy storage subsidy programme?

The energy storage sector in Poland showed significant momentum even before the launch of this new subsidy programme. Through power market auctions for 2021-2028 and supplementary auctions for 2021-2025, contracts for energy storage with a total capacity of 9.5 GW were already wrapped up.

The European Commission authorized the subsidy scheme in October 2024 to the tune of EUR1.2 billion in a bid to support the installation of at least 5.4 GWh of new electricity ...

The European Commission has approved a EUR1.2 billion Polish scheme to support investments in electricity storage facilities to foster the transition to a net-zero economy.

These facilities must be connected to either the distribution or transmission networks at all voltage levels to ensure a broad impact on ...
